SNOOKER –O

The aim was to complete one frame of snooker- O by navigating around the 'table' pocketing 10 reds, each followed by a chosen colour. Having pocketed these 20 balls, the 6 colours were to be taken in the correct order. The frame did not have to be completed in a single break so if a red or colour was missed the frame could be continued by starting a new break. This happened several times with runners missing a colour. Runners who visited more than 10 reds had those scores wiped as did those that visited a red more than once. To complete the whole frame was a tough ask in 45 minutes but well done to all those that tried.
