

Simon Peck Summer Series

Moreton Hall

21st June 2016

Thanks to you all for coming and making my mapping and planning worthwhile. My aim with the courses was to ensure that the most direct route would involve ducking and diving through the middle of the various areas of the housing estate. This made it more interesting navigationally for you. We had some excellent times for the courses especially for the long course which I had measured as an optimum length of 10.1 km
